

PROJECT INTRODUCTION

Goldario is the world's first-ever platform that revolutionizes the entire eco-cycle involved in the mining, manufacturing, polishing and retail business of precious metals (gold) and precious stones (emerald). It serves as a financial instrument that is a digitized share in gold and emerald mines, in-house jewelry production factories and jewelry retail businesses for the global market.

TOKEN SALE SUMMARY

- › Start of Token Crowd sale: Date 01-07-2020
- › Duration: 180 days
- › Token symbol: GLD
- › Token standard: ERC-20 (For Token Sale)
- › Soft cap: 300 million USD
- › Hard cap: 1 Billion USD Total token supply: 1,000,000,000
- › Token price: 1.00 USD per token
- › Bonus allocation: 30%

Our Vision

We envision to revolutionize the entire eco-cycle of the precious metal industry by utilizing the power of innovative technologies, i.e., blockchain, cryptography, smart contracts, and Fintech. We aim to create an ecosystem whereby everyone—whether individuals with lower investment minimums, HNIs or venture capital organizations – can invest in a potential underlying business while also taking care of security, auditability, and liquidity.

Our Mission

Goldario aims to be the world's leading platform of choice for consumers and businesses dealing in the precious metal industry. It strives to allow users to obtain and have entitlement over physical mines, jewelry production factories, and jewelry retail businesses from across the world, and in doing so, create potential underlying asset backing to GLD Token.

Token Allocation

- Sale via Block Processor
- Bonus allocation in BP
- Sale Via Exchanges
- Discounted sale
- Bounty Programs

Funds Distribution Plan

- Direct Investments
- Marketing and Bounces
- Operations
- Platform development
- Team development
- Founders team

Problems & their Solutions

Restrictive Accessibility	➡➡➡➡	Enabling access for all by offering blockchain-based cryptographic
Centralization of business model	➡➡➡➡	Decentralization through tokenization of underlying business and distributed value
Trust deficit between transacting parties	➡➡➡➡	Trustless deeds and transparent transactions through blockchain-based Smart contracts
Huge Payment Processing Fee	➡➡➡➡	Near to zero transactional costs
Middleman adds to the cost	➡➡➡➡	Goldario enables trustless transactions through Smart Contracts
Lower Liquidity and Easy Exit	➡➡➡➡	Goldario offers liquidity and easy exit opportunity by enabling the exchange of GLD Tokens in third party exchanges and peer to peer exchange
Non-Transparent Revenue Sharing	➡➡➡➡	With Goldario, you get access to a potential business with multi-stream revenue and periodic rewards (dividends), all in a trustless and transparent manner.

WHY CHOOSE GOLDARIO?

- 1 Futuristic business model
- 2 Revenue Sharing through rewards
- 3 An expert team and advisory board
- 4 Earn passive income through periodic rewards (dividends) on your purchase (Investment)
- 5 Established infrastructure and ready operations
- 6 Self-sustainable operations
- 7 Transparent transactions
- 8 Multi revenue in-streams
